Chess'Up !

*The Robot which has more pieces on its color wins the match*

POSITIONNING OF PLAYING ELEMENTS AT THE BEGINING OF THE MATCH

The position of the playing elements in the green area at the beginning of a match is defined as follows:

Each playing element will be positioned in a rectangle of 200mm wide and 400mm long.

The game elements will be positioned randomly in each of these rectangles.
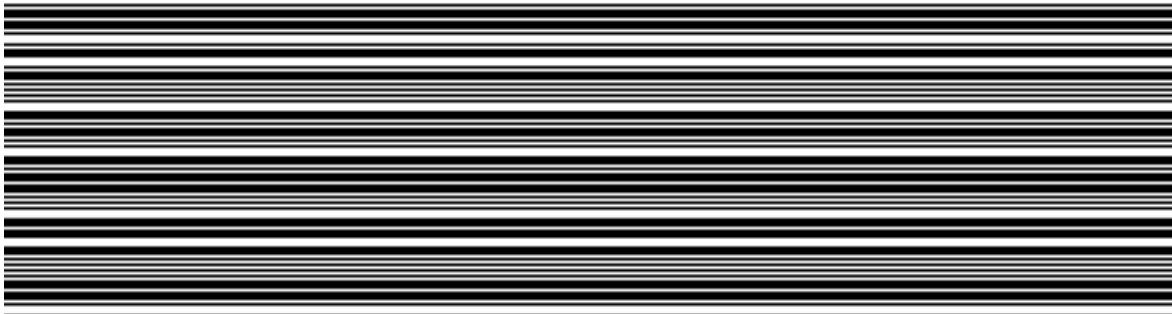

The white rectangles are not painted on the table.
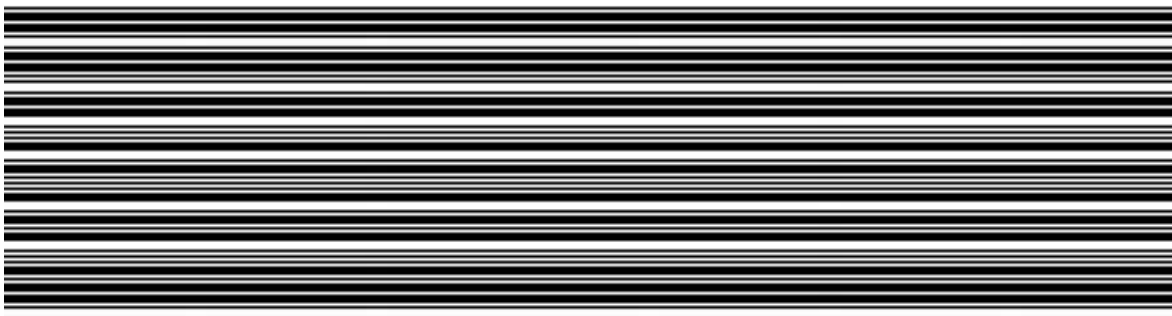

INFORMATION ABOUT THE BARCODES

Barcodes measure 46mm height. They will be printed in black on mate white background, the first letter aligned with the bottom element (king or queen).

We decided to modify the words used for the barcodes in order to have same scale and size barcodes

Bar-code of queens (word "QUEEN", without the quotation marks, encoded in Code 39 barcode type):

Bar-code of kings (word "KING-", without the quotation marks, encoded in Code 39 barcode type):
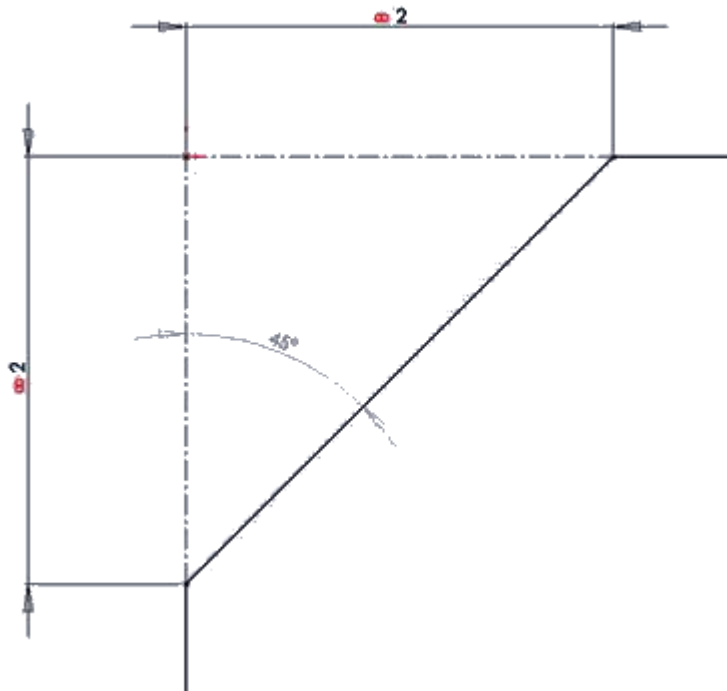

REMINDER ABOUT PAWNS KINGS AND QUEENS

All elements diameter is 200mm and there are chamfers on top and bottom of elements of 2mm length.

INFORMATION FOR TEAMS WITHOUT NATIONAL QUALIFICAITONS

Eurobot has decided that the 3 teams selected from a country where more than 3 teams register but where the national cup is not organized, will be selected based on their pilot studies, not based on the order of submission of the pilot studies as written in the rules.
